product that
is designed
for a long-
time-use
is a sustainable
product.*

HAVE A SEAT - the innovative brand

HAVE A SEAT situated at Lake Starnberg passionately develops cushions for a fantastic sitting experience since 2016. Quality, comfort, design and sustainability are in our focus while developing our products.

HAVE A SEAT products mainly differ to all others on the market by the washability up to 95°C and the orthopedically correct design.

Exactly this overall concept is very much appreciated by our faithful and loyal customers.

Dealer and consumer services

In order to achieve customer satisfaction, we have expanded our dealer and consumer services. Sales training, free promotional materials and dropshipping have massively increased retail sales.

This and our optimized logistics have led to high dealer and consumer satisfaction.

Made for relaxed sitting

All HAVE A SEAT products differ in many respects from all other products on the market:

Seat comfort:

The secret to the unique sitting experience lies in the filling material itself, its amount and spreading. This was developed and optimized with orthopedists and textile technicians to achieve the greatest possible comfort factor. Thanks to our additional back-to-shape finishing, these properties are retained after every wash and over many years.

Your customers will love you for it!

Hygiene / Washability:

Stubborn dirt and stains can be removed by washing at a temperature up to 95°C in the whole.

Stoffqualität:

Our fabrics made of sturdy, highly durable cotton blended fabric are characterized by high quality. Of course all fabrics are OEKO-TEX® STANDARD 100 certified.

At a glance

- Washable up to 95°C in the whole
- Suitable for allergy sufferers
